

GREAT POLAND BATTLE STILL IN PROGRESS

Armored Autos Dash Into Infantry and Scatter It

PETROGRAD, December 6. (Associated Press by Federal Wireless).—An official statement of the situation in Poland issued last night, says that the fighting is still going on in the region west of Lodz and on the road west of Lodz and Piotrkow, with the Russian locked in many places in hand-to-hand conflicts. The battle, general, is going in favor of the Russians, who are taking many prisoners and inflicting enormous losses upon the Austro-German invaders.

CHARGED WITH AUTOS

On Friday night a column of German infantry, which was on the march between Piotrkow and Lodz, west of Lodz, was charged into by a number of Russian armored automobiles, armed with machine guns. The automobiles were close to the marching column before they were observed, having approached in the darkness, and they tore through the front ranks without resistance, killing and maiming hundreds.

When the advance of the heavy machines was blocked with bodies, the machine guns were turned loose at only a few yards range, the Germans being utterly unable to stand and face the awful carnage. The column was completely broken up and dispersed, leaving hundreds of dead and wounded where they fell.

ENDLESS STREAM OF PRISONERS

A dispatch received here yesterday from Minsk, one of the main railroad lines from Warsaw, says that an endless stream of Austrian and German prisoners has been passing through that city for the past several days, being taken to the concentration camps in the interior.

BLOODIEST FIGHT OF WAR

Some of the details of the great battle fought early last week near Lodz are being made public. The fight was the bloodiest and most pitiless battle of the great war to date, east or west. The most sanguinary engagement took place between Russia and Germany. Here a great mass of Germans had been surrounded. In order to get out, the main army had to cut its way for fifteen miles with bayonets. It was hand-to-hand fighting with the Russians yard after yard and mile after mile.

In the deadly strife the Germans lost ninety per cent of their officers. Many of the remnants had less than one hundred men left when they got through to safety.

The fighting lasted thirty-six hours, and the Germans charged repeatedly over mounds of their dead.

GERMANS FIGHT TO END

In commenting upon this fight, and the general character of the war where Russian troops fight the Germans, the Boston Gazette compares the quality of the German fighting man with the Austrian.

The Gazette says that the Austrian artillery begins to withdraw before the battle is really decided and the officers are always captured. The German, on the other hand, fights to the end.

NEED YANKEE SLEIGHS FOR BATTLEFRONT

CHICAGO, December 6. (Associated Press by Federal Wireless).—The Yankee sleigh has become a necessity in the European war and thirty thousand have been ordered from local carriage makers by the British and French governments. The sleighs are to be used for the transportation of supplies in the snow-covered districts of the field of operation this winter.

D. W. TAYLOR SUCCEEDS WATT AS BUREAU CHIEF

WASHINGTON, December 5. (Associated Press by Federal Wireless).—David W. Taylor, naval constructor with the bureau of construction and repair at the navy yard, has been appointed chief of the bureau of construction and repair, with the rank of rear-admiral. He succeeds Rear-Admiral Richard M. Watt, whose term expires on December 14. Admiral Watt's future duties have not been determined.

LIGHTSHIP ADRIFT AND IN DANGER

NORFOLK, Virginia, December 6. (Associated Press by Federal Wireless).—An unidentified vessel, believed to be the Cape Charles lightship, is in danger of stranding off Virginia beach. Life-savers are standing by, ready to assist if called upon.

KAUAI-BOUND SHIP PUT BACK AFIRE

PORT ANGELES, Washington, December 5. (Special to Merchants Exchange).—The schooner Oceania, en route for Port Allen, Kauai, on December 2, returned to the port last night much damaged by a fire that was caused by the officers' and crew's quarters of the ship. The cargo is believed to be intact.

MEXICO HAS STILL ANOTHER REVOLT

Salazar and Campa Start Up a Revolution All Their Own

EL PASO, December 6. (Associated Press by Federal Wireless).—A new revolutionary movement has been started in Mexico, according to copies of proclamations received here. These proclamations call upon all true Mexicans to unite in a general movement to drive from office all usurpers, including General Carranza and Villa. The proclamations are signed by General Salazar and General Emilio Campa.

Reports which have reached here say that these two have a considerable force at their backs, which they are leading through Central Chihuahua for an early attack upon Casas Grandes. To Destroy British Railroad.

WASHINGTON, December 6. (Associated Press by Federal Wireless).—

The British ambassador, yesterday informed the state department that he was in receipt of a dispatch from the British chargé d'affaires in the City of Mexico which reported that Carranza had given orders for the destruction of the Vera Cruz-Mexico railroad, the property of British subjects.

WHITE SLAVE GIRL CALLED BLACKMAILER

CHICAGO, December 6. (Associated Press by Federal Wireless).—Jessie Cope, the complainant against Colonel Charles Alexander, the Rhode Island millionaire who was yesterday indicted upon a charge of violating the Mann White Slave Act, was arrested Friday upon a charge of attempted bribery and blackmail.

It is charged that the girl offered to share \$50,000 with a federal government official, provided the latter would aid her in extorting that sum from Colonel Alexander. The colonel was arrested Friday at Providence, Rhode Island, and released on bail, the hearing in his case being set for January 5.

Youthful American Corn Grower

Makes Record in Extensive Farming

R. A. Jordan, one of the pioneers of this territory, recognized as the father of the pineapple industry in these islands, sees in the achievement of a youthful corn grower in the states a possible chance for the cane and pineapple growers of Hawaii to increase their yields. In a communication to the market and farm page of The Advertiser, Mr. Jordan says:

"Can sugar and other growers get a bigger return from their acreage by studying the following results actually produced in more than one instance lately through intensive fertilizing and cultivation during the term of the crop from plowing to harvesting?"

"A boy, being one of others in the States, made the following report on his one acre of land he planted in corn: 'I first cut the stalks with a stalk cutter (so evidently this was not virgin soil) and turned the soil March 1 with a two-horse plow from top to twelve inches deep, then the land was double cut with a disk harrow and on April 7 I laid on the rows three feet apart, bedding it with a one-horse turner, planted the corn in the water furrow and using two hundred pounds of 10-4 guano."

"The corn came up a perfect stand. The first plowing I used a cultivator just deep enough to loosen the soil. At the second a single stock with scupper and disk, applying 200 pounds of the same fertilizer (guano). The third cultivation was done with a harrow and 400 pounds of the guano was put on. Then the corn was thinned out to a stand of about eight inches in the drill."

"The fourth cultivation was also done with a harrow and 800 pounds of fertilizer spread on, though after the fifth harrowing I used only 200 pounds. Following the sixth plowing I used 100 pounds of nitrate of soda."

"The seventh and last plowing was done by a one-horse cultivator very lightly. The cost of this one acre was as follows:

Preparing the land \$1.50
Plowing the acre 1.00
Harrowing the acre 1.00
Work of horses 2.40
Gathering the corn 8.00
Rent of land 5.00
Fertilizer 26.70
Seed corn 50.00

Total cost \$106.40

Total value of crop \$227.50

Bushels at 90c.....\$20.41

Total cost.....46.40

Profit to balance.....\$163.01

"Can we repeat or improve on the above?"

NEW YORK IN GRIP OF SEVERE STORM

NEW YORK, December 6. (Associated Press by Federal Wireless).—The first severe storm of the winter is raging, and last night the charity shelters were overflowed by the number applying for refuge from the elements.

PILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. Made by PARIS MEDICINE CO., Saint Louis U. S. of A.

BERLIN REPORTS PROGRESS ALONG FRENCH FRONT

BERLIN, December 6. (Associated Press by Federal Wireless).—The French attacks on the German lines to Flanders and south of Metz have been repulsed, says an official announcement. The German armies have progressed at La Bassa, in the forest of Argonne and southwest of Altkirch.

IN POLAND THE GERMAN OPERATIONS ARE TAKING THE MARITAL COURSE.

BRITISH SUBMARINE SUNK. The Constantinople correspondent of the Frankfurter Zeitung says that a British submarine attempted to run the gauntlet of the Dardanelles today but was discovered by the Turkish forts and fired upon. The Germans believe they sunk the submarine.

KRUPPS NOT BOMBARDED

An official statement says: "The Krupp works have not been bombarded by British aviators, as was reported."

SCHOOL BUDGET BEING PREPARED

The school commissioners will meet in the rooms of the board of education tomorrow and Tuesday to go over and prepare the school budget for the coming biennial period. The budget to be submitted to the legislature during its next session, which will begin the third Wednesday in February.

From tentative figures now on hand, H. W. Kinney, superintendent of public instruction, believes that the budget will be smaller than the last one prepared by the commissioners. The outside counties will show considerable decrease in the amounts the legislature will be asked to appropriate.

Honolulu, however, may ask for a larger sum. Mr. Kinney says this will be necessary because, while the school attendance in the outside counties remains practically at a standstill, in Honolulu school attendance is increasing at the rate of from 1000 to 1200 a year.

At the session tomorrow and Tuesday only a quorum will be in attendance. The commissioners who will attend tomorrow's meeting will be T. Brandt of Kauai; Mrs. B. D. Bond of Kohala, Hawaii; D. C. Lindsay of Kahului, Maui; and L. O. Blackman of Honolulu. Besides the commissioners, Superintendent Kinney and Director General of Schools Raymond will be in attendance at the meetings.

Mr. Brandt will return to Kauai tomorrow afternoon but the arrival of Mrs. Theodore Richards from the mainland Tuesday morning will guarantee a quorum at Tuesday's meeting. W. H. Smith, commissioner from East Hawaii is now on the mainland.

BERLIN AND BUDAPEST EXCHANGE COMPLIMENTS

LONDON, November 22.—Correspondence of The Associated Press.—The municipalities of Berlin and Budapest have been exchanging complimentary messages. The war has drawn the two cities into closer intimacy. The Oberbürgermeister of Berlin has been informed by the corresponding official in Budapest that one of the most beautiful streets and squares of the latter city have been called respectively "Kaiser Wilhelm Strasse" and "Berliner Platz," and the Berlin Oberbürgermeister, not to be outdone in courtesy, replied that the Berlin municipality has decreed that one-half of the Konigsplatz Strasse is to be named after the Hungarian capital.

A. W. KEECH MUCH HURT ON COAST

SAN FRANCISCO, December 5. (Associated Press by Federal Wireless).—A. W. Keetch, a retired Honolulu business man, was struck by a street car here today and knocked down, sustaining a concussion of the brain. He will recover.

CARDINAL DI JETRO DEAD

ROME, December 5. (Associated Press by Federal Wireless).—Cardinal Anselmo di Jetro of the Sacred College died today.

AMERICAN BRIDGE MEN AFTER TRADE

NEW YORK, December 5. (Associated Press by Federal Wireless).—A big party of engineers and financiers of the Lackawanna Steel Company sailed today for France to inspect the bridges that have been ruined by the war. The company will bid on millions of dollars' worth of business in supplying structural steel for the bridges to be built in place of those destroyed.

LONDON, December 5. (Associated Press by Federal Wireless).—Have been played with shipping, including war vessels, by a terrific storm that is raising a sea and in the channel. The cruiser Venus seeking port struck at full speed. An enormous sea carried away the foremast and bridge.

The Norwegian steamship Waterloo foundered off Lizard rock and only three were saved.

An unidentified steamer is ashore near the Malay.

The steamer Anthony has wrecked in distress fifty miles north of Lizard rock.

LEFT VAST ESTATE TO HUSBAND—CUT ALL RELATIVES OUT

Will of Thelma Parker Smart. Read After Funeral, Bomb-shell To Blood Kin

HUSBAND AND HUSBAND'S RELATIVES ONLY NAMED

Provisions of Trust Deed Held During Mother's Life—Smart Sure of \$3000 a month

(From Sunday Advertiser.)

The will of the late Mrs. Galliard Smart was read at her former home at Waiman last week, following the interment of her ashes. Practically her entire estate, valued at approximately two million dollars, is left to her husband. Relatives of Mr. Smart also are remembered by bequests ranging from one thousand dollars to five thousand dollars.

Mrs. Smart's blood relatives, including her mother, are not mentioned in the document. Neither is her surviving son.

The will, it is understood, was executed last January, having been drawn at the request of Mrs. Smart by Frank E. Thompson. The instrument is to be filed for probate at once.

It could not be learned definitely yesterday whether relatives of Mrs. Smart not mentioned in the will are to file a contest, but it is reported that such action is probable.

A. W. Carter, trustee of the vast estate, when interviewed last night, had no statement to make except that he was present when the will was read and that it probably will be filed at once.

Trustee Has Full Power

Mr. Carter was appointed trustee of the estate upon the death of Mrs. Smart's father. When she reached her majority, about two years ago, the property passed into her full control, but upon afterward she asked Mr. Carter to again assume trusteeship of the estate under a trust deed, the terms of which are that the estate is to remain in trust during the lifetime of her mother, Mrs. Elizabeth J. Knight. The deed of trust, filed April 26, 1912, is irrevocable. It gives Mr. Carter full power in the management of the estate, the income from which is believed to be close to \$200,000 per year. Under its terms Mrs. Smart was allowed an income of \$2000 per month and her mother is given \$1000 per month until the independence of the property is paid off. The will, in effect, subject to the terms of the trust deed during the life of Mrs. Knight, and Mr. Smart does not immediately enter into his full inheritance. He will receive one-half the net income, however.

The trust deed provides that after the indebtedness of the estate is paid off seventy-five per cent of the net income is to be paid as follows: Two-thirds of it, or fifty per cent of the whole net income, to Mrs. Smart, and one-third, or twenty-five per cent of the income, to Mrs. Knight. Provided that Mrs. Smart's income shall not at this time be less than \$3000 nor her mother's less than \$1500 per month, any deficiency of the income to be made up from the remaining twenty-five per cent of the net earnings.

The twenty-five per cent of the earnings not definitely provided for is to be used by the trustee for educational, charitable or public welfare purposes, or for the purchase of real estate or other investments.

The trustee receives compensation in fees and commissions provided by law in the administration of estates, and he is required to give bond in the sum of \$100,000.

Mr. Carter was required to make Mrs. Smart a quarterly report, but is not required to file any account with any court. "It being the wish and agreement of the parties hereto that recourse shall not be had to any court unless absolutely necessary," reads the deed of trust.

Engels Copper Company Is Now Ready To Put Rich Ore On The Market

A cablegram has been received by A. J. Campbell from E. E. Paxton, manager of the Engels Copper Company, stating that the new flotation mill was started in successful operation, December 3. This is the California company in which a large amount of Hawaiian capital was invested and which recently underwent a reorganization and change of management.

The company owns a large area containing rich ore bodies. Since E. E. Paxton resigned his position with Alexander & Baldwin and went to the mines to devote his entire attention to the work of development, remarkable progress has been made, and the proposition is rapidly being placed on a business footing.

LONDON, December 6. (Associated Press by Federal Wireless).—A dispatch from Rome says that the government is receiving the solid backing of parliament, a vote of confidence yesterday being passed by four hundred and thirteen to forty-nine.

Less fortunate has been the Serbian ministry, which yesterday, in the face of a vote of censure, resigned.

The Lisbon correspondent of the Exchange Telegraph Agency says that the entire cabinet of Portugal has resigned.

LONDON SILENT ON SITUATION ON WESTERN FRONT

Russians Pursue Turks Across Persian Border and Win Another Victory

LONDON, December 6. (Associated Press by Federal Wireless).—King George has returned from France, and there are countless rumors of great things developing along the Allied front. Both France and Belgium, but nothing whatever concerning the progress made is being given out at the official press bureau or the war office.

A dispatch to The Times from Flanders says that King-George, while with King Albert at the front, conferred upon the Belgian monarch the decoration of the Order of the Crown.

Russians in Persia

That the Russians have been compelled to invade Persian territory in order to reach the Turkish front, which had withdrawn there and which Persia could not interfere through lack of ability to enforce her orders, is the news which comes officially from the headquarters of the Russians in the Caucasus.

The report says that the Russians entered Persia on December 2, capturing the Turkish positions at Sari and Keckkil and driving the Turks back out of Persia towards Van Armenia. The retreating Turks left large quantities of supplies, provisions and munitions, which fell into the Russian hands.

FIGHTING IN ALSACE

A news dispatch from Basel, Switzerland, says that heavy cannonading can be heard in progress in Alsace, in the direction of Altkirch, where the German army is fighting the Russians.

Near Dornheim four hundred inmates of a madhouse became so frantic at the sound of the guns that the Germans conveyed them to Mulhausen.

ARIZONA LAW IS SUBJECT OF PROTEST

WASHINGTON, December 6. (Associated Press by Federal Wireless).—Protests against the enforcement of the Arizona anti-labor employment law have been filed with the department of state by the governments of Great Britain and of Italy, almost identical in their terms. The state department has asked Governor Hunt to suspend the operation of the law for the present, to allow investigation and test.

T. B. STUART SUCCEEDS JUDGE ROBINSON

Judge Thomas B. Stuart was appointed third judge of the first circuit court of Hawaii by President Wilson December 4. This announcement was made yesterday, following the receipt of a cablegram directing Judge Stuart to qualify for the position, as his commission had been mailed to him.

Judge Stuart was a resident of Colorado until August, 1913, when he came to this city. He is sixty-eight years of age, was born in Ohio, is a veteran of the Civil War and has practiced law in Ohio and Colorado for forty-seven years. He was elected a representative in the Colorado legislature several times, and was speaker of the lower house twice.

Judge Stuart filled out one term on the bench in Denver. He has been active in political circles in Colorado for many years.

While Judge Stuart has been a resident of Honolulu for a little over a year, he has not taken an active part in the affairs of this community and does not have a wide acquaintance among the members of the local bar. Much surprise was expressed yesterday by members of the bar and by citizens generally when they learned of this appointment.

HOMESTEAD AGREEMENTS SIGNED BY GOVERNOR

Governor Pinkham approved a number of public lands documents yesterday, among which were special homestead agreements, transfers and planting agreements, as follows:

Special homestead agreements: Malolo, Ala, lots 184 and 193, Lualaba, Waialeale, Oahu, and John T. Teves, lot 17, Kaao homesteads, Hamakua, Hawaii.

Transfer: Mary Nani Harper to Mary Ika Harper, lot 21, Lawai homesteads, Kauai.

Planting agreements: Julia Ignacio, lot 3, Kaleo homesteads, South Hilo, Hawaii, and the Queen's Sugar Company, and the Lualaba Sugar Company, and Charles Kaohu, lots 74 and 75, Manowai homesteads, North Hilo, Hawaii.

PARIS, December 6. (Associated Press by Federal Wireless).—The program is being made by the Allies north of the River Lys, according to an official statement. They have advanced five hundred yards and occupied two lines of German trenches. Midway between Dixmude and Ypres the Allies have captured the right bank of the Yser Canal.

Near Rheims the French cavalry and artillery have destroyed several earth fortifications. In Argonne hot fighting continues, and the French have occupied several trenches and repulsed all counter attacks. Nothing noteworthy is taking place in Alsace-Lorraine.

GOVERNOR RIGHT IN LINK'S VIEW

Proposed New Charter Does Not Safeguard Public As Old Charter Does

"I am inclined to uphold the Governor in his contention in regard to the Rapid Transit," says L. L. McCandless, who, in stating his reasons for approval, indicated that he had read understandingly neither the terms of the existing charter or the terms of the proposed new one.

"The charter under which the company is now operating is a fair one," he said, "as company must turn back into improvements and betterments all earnings in excess of eight per cent of, on failure to do so, pay the surplus into the treasury. It is this provision in the original charter which has forced the company to maintain its equipment in perfect condition, pay and wages, and give good service to the public in return for the right to use the public streets."

No Future Safeguards

"The new charter in the form in which it is now before congress contains no such provisions safeguarding the interests of the public."

"It is in favor of municipal ownership of this and other public utilities. When the period of the present charter expires the property should pass to the city of Honolulu and be operated by the city government."

"The extended charter transforms the street railroad company into a wealthy money-making proposition, and contains such limiting clauses as the present one. It gives the corporation the right to go ahead and exploit the public for the benefit of the shareholders for all the money there is in it."

Scientist Finds Quiet Atmospheric Conditions Here Ideal For Important Experiments

After lying in ill-health and partially dismantled for more than two years, the observatory at Kaimuki established by the College of Hawaii about four years ago is being repaired and placed in condition for observation work and a series of photographic experiments which may result in adding materially to the present knowledge of science in regard to the planets and stars.

The observatory was built during the time Hailor's comet was coming into view, early in 1910. The observations of the great celestial body secured from there are believed to have been the best obtained anywhere in the world, because of the ideal weather conditions that prevailed here during that time.

The observatory is fitted with a large and powerful six-inch telescope. The building is in a first-class condition, except for the rotting mechanism. At disposal of scientist.

Through the courtesy of the College of Hawaii the observatory has been placed at the disposal of Prof. T. S. H. Shearman of Vancouver, whose arrival was announced last week. He is receiving every aid from Prof. John S. Donaghoe of the College of Hawaii.

Professor Shearman is connected with the University of British Columbia, as well as being a director of the Vancouver observatory. The European war delayed the plans of British Columbia scientists in establishing an immense observatory in that country, and Professor Shearman has come to Hawaii to study the conditions here.

It has been found that while passing clouds, occurring as frequently as they do in these latitudes, may interfere slightly with constant observation work, the steadiness of the atmosphere makes this an ideal section for sky photography. Unusually atmospheric conditions have been one of the great obstacles to astronomers heretofore in securing clear photographs of the stars and planets.

Professor Shearman has a powerful photographic equipment for his purpose, and to this line of experiments he will direct his principal efforts during the three months he plans to remain here.

It is understood that if he secures satisfactory results from this work one of the many observatories which are planned to be established in many parts of the world within the next few years will be located here.

AND SHE ONLY KILLED A MAN

ST. LOUIS, Missouri, December 6. (Associated Press by Federal Wireless).—Ada Orsley, the woman who shot her husband last spring, killing him because he bragged to her of his conquests over other women, is now out of jail on parole. She was fined \$500, after conviction, and has been in jail unable to meet the penalty.

A GERM DESTROYER

There is no danger whatever from lack-lustre blood poisoning resulting from a wound when Chamberlain's Pain Balm is promptly applied. It is an anesthetic and destroys the germs which cause these diseases. It also causes wounds to heal without maturation and in one-third the time required by the usual treatment. For sale by all dealers. Benson Smith & Co., agents for Hawaii.

PACIFIC IS NOT WORTH FIGHT SAYS JORDAN

Would Give Up Control Rather Than War With Japan

WASHINGTON, December 6. (Associated Press by Federal Wireless).—Declaring that he would much prefer seeing the United States surrender altogether the control of the Pacific than go to war with Japan to maintain it, David Starr Jordan made a strong speech yesterday at the meeting of the National Civic Federation against what he characterized as "the trade against the inefficiency of the army and the navy."

LESS ARMAMENT NEEDED

Doctor Jordan declared that America should protect against the agitation for more armament, rather than join in a demand for a greater army and navy. "At this time, when the nations of the earth are crumbling each other in the greatest war in history, we should set our face, as a nation, against war and preparations for war," he said. "The lesson that we should learn from the war that is raging is that preparedness for war brings war."

He asserted that the United States need never fear an attack by Japan, contending with his statement that he would rather see the control of the Pacific abandoned than battled for.

NAVY TO GIVE TIME

Col. Robert M. Thompson, chairman of the executive committee of the Navy League of the United States, advocated the effort to secure a navy strong enough to hold the seas for at least a year against any invader, which delay would enable the army department to make ready a force to take the field in defense of the land.

After a lengthy and stormy debate between the advocates of greater national protection and the peace advocates, a resolution was passed advocating the creation by the United States government of a council for national defense.

Little Girl, Preparing for Santa Claus, Victim of Some Brute's Lust

SACRAMENTO, December 6. (Associated Press by Federal Wireless).—A murder case which, in some of its revolting details, recalls some phases of the notorious Duran case in San Francisco, has excited this community. The victim is Margaret Kling, a ten-year-old child, whose mutilated remains were discovered in the basement of the German Lutheran Church yesterday afternoon. An examination of the body showed that the little girl had been outraged before she was killed.

On Christmas Eve

The first indication that a crime had been committed was brought to the attention of Margaret's chums when they entered the church to meet in the church for dolls' clothes for the Christmas tree babies. Blood dripping through from the floor of the bell tower startled them and they raised an alarm.

A search of the bell tower showed a blood pool upon the floor and signs of a struggle. A further search revealed the mangled body of the child in the basement, where Frank had been thrown. She was thrown upon David Fontaine, the church janitor, and he is now being held under arrest, pending the findings of the coroner's jury.

NO PROTECTION FOR HAVANA GAMESTERS

HAVANA, Cuba, December 6. (Associated Press by Federal Wireless).—The Liberal Club, one of the wealthiest and exclusive clubs of the city, was raided last night and a large number of the members placed under arrest on a charge of gambling.

BERRY NOW OWNS SEALS' FRANCHISE

SAN FRANC
